Advanced Palm Print Comparison Techniques

James E. Bush, CLPE, CSCSA

3 Days | 24 Hours | Tuition \$400.00

Course Description:

DO YOU KNOW what part of the palm, right or left hand, and correct orientation of palm prints are and how to teach palm print comparison techniques to the people you supervise? If you have an Automated Palm Print System, DO YOU KNOW how to position the latent palm print to maximize the search accuracy and efficiency of your system? If NO is the answer to any of these questions, then you can benefit from this workshop.

The purpose of this workshop is to substantially improve the ability of the latent print examiner to conduct comparisons in a more time and cost efficient manner. This workshop is designed to benefit examiners at all expertise levels from the new trainee to the latent print supervisor. The practical exercises have been prepared in such a manner that each student will be working with material equal to their level of expertise and progress to more difficult assignments as their ability grows. These techniques can be immediately applied to both manual and automated palm print searching.

Target Audience:

This workshop is designed to benefit examiners at all expertise levels from the new trainee to the latent print supervisor. The practical exercises have been prepared in such a manner that each student will be working with material equal to their level of expertise and progress to more difficult assignments as their ability grows.

General Course Information:

This training seminar has been approved for 24 hours of Continuing Education Credit required for I.A.I. Certification and Re-certification. Certificates of attendance, authorized by the International Association for Identification, will be awarded to each student successfully completing the seminar.

Attendees do not need to bring a fingerprint magnifier to this class.

Class attire is business casual.

Course 3 of 11 in our Friction Ridge Curriculum.

This course is approved for IAI certification/re-certification
