Forensic Examination of Violent Crime Scenes

John P. Black, CLPE, CFE, CSCSA

3 Days | 24 Hours | Tuition \$400.00

Course Description:

Crime is typically divided into two categories: crimes against property and crimes against persons. While the former is serious and may indeed constitute the majority of departmental caseloads, it is the latter that frequently results in serious bodily harm or death. Therefore, it is imperative that appropriate forensic and law enforcement personnel be able to successfully recognize, document and/or interpret evidence found at these types of scenes. Furthermore, it may be important in a particular scene to be able to sequence a series of events to reconstruct how a crime may have occurred and the actions that were involved. This may allow the trained analyst/investigator to support or contradict statements offered by suspects, victims and/or witnesses, thereby providing further insight into an investigation.

This advanced course will present both the theory and practical application of several techniques that are essential to crime scene examination and reconstruction of violent crimes. Practical exercises and case studies will be utilized to reinforce the material presented.

Target Audience:

This course is designed for everyone who is tasked with investigating and processing violent crime scenes, particularly those involving bloodshed. Although it is beneficial to have prior training and experience in bloodstain pattern analysis, it is not a requirement for this course. Even if you are not the person who will be interpreting bloodstain and shooting evidence, you should attend this course if you will be responsible for documenting these types of crime scenes.

General Course Information:

- This training seminar has been approved for 24 hours of Continuing Education.
- Credit required for I.A.I. Certification and Re-certification. Certificates of attendance, authorized by the International Association for Identification, will be awarded to each student successfully completing the seminar.
- Students should bring their camera (digital preferred), lenses, batteries, media, off-camera flash with remote cord, tripod (if available), and flashlight. Students should also bring the instruction manuals for their specific camera and flash, if available.
- Also, practical exercises will be conducted both inside and outside. Students are advised to bring clothing suitable for possible soiling as well as inclement weather.

Course 4 of 7 in our Crime Scene Curriculum.

This course is approved for IAI certification/re-certification
