Fundamentals of Latent Print Examination

Debbie Benningfield, CLPE

Charles Richardson, CLPE

5 Days | 40 Hours | Tuition \$600.00

Course Description:

This class is one in a series of courses designed to teach the participant the Fundamentals of Latent Print Examinations and to help them develop practical skills when approaching friction ridge comparisons. Students should come prepared to participate in a very intense week. Numerous practical exercises are planned that will emphasize the lectures. Students will work on comparison exercises that will both match and challenge their own level of experience. These exercises are developed to allow the students to work at their own pace. Students will receive instruction on:

- Basic history and basic principles of the Science of Fingerprints
- ACE-V Methodology
- Basic Searching Smart skills
- Basic Orientation and location of friction ridge detail found in palms
- Understanding of the various capture methods for recording friction ridge detail
- Daubert trilogy.

Target Audience:

This 40-hour course is designed for the next step in the training of those individuals currently working, or seeking, a career in the friction ridge examination profession. The curriculum serves to enhance the skills of those specialists currently working in latent print examinations or for the transition from tenprint analysis to latent print examinations.

General Course Information:

This training seminar has been approved for 40 hours of Continuing Education Credit required for I.A.I. Certification and Re-certification. Certificates of attendance, authorized by the International Association for Identification, will be awarded to each student successfully completing the seminar.

Attendees must bring a fingerprint magnifier and ridge counter(s) to class.

Class attire is business casual.

Course 5 of 11 in our Friction Ridge Curriculum.

This course is approved for IAI certification/re-certification
